Table and Figure

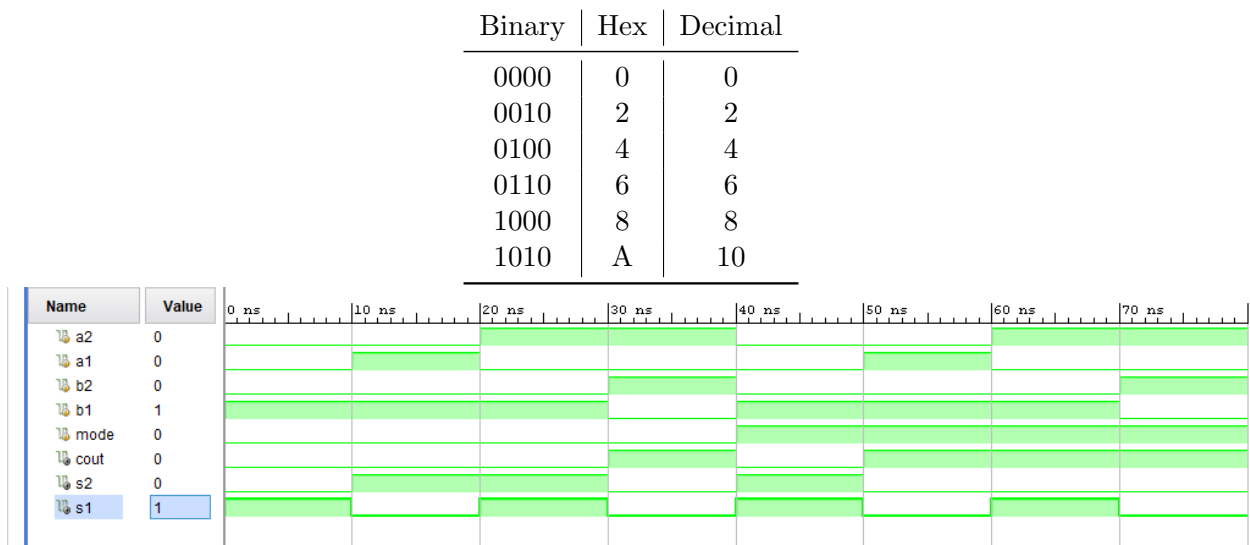

Figure 1: Table and simulation waveform to reproduce

Screenshot

Code

Listing 1: Example Code

```
module example
  #(parameter BITS=4)
  (
    input [BITS-1:0] in0, in1,
    input sel,
    output [BITS-1:0] out
  );

  // Choose in1 or in0
  out = sel ? in1: in0;
endmodule
```
